Subject: NDWAC Recommendations on Lead and Copper Rule Revisions
[NDWAC - Recommendations to the Administrator 121515.pdf](#)
[Final NDWAC LCR WG Recommendations to NDWAC Aug 24 2015.pdf](#)
[NDWAC LCR WG Statement of Dissent Oct 15 2015.pdf](#)

Hi Paul,

Per our discussion yesterday, attached are the following National Drinking Water Advisory Council (NDWAC) documents on the Lead and Copper Rule (LCR) Revisions:

- 1) NDWAC Recommendations to the EPA Administrator (Transmittal letter, December 15, 2015);
- 2) Report of the LCR Working Group to the NDWAC (August 24, 2015); and
- 3) Dissenting opinion on NDWAC LCR Working Group (October 15, 2015).

The NDWAC forwarded the final LCR Working Group report to EPA with some additional recommendations (enhancements) on page 3 of the transmittal letter.

I am including the 'Statement of Dissent' from one member of the NDWAC LCR WG regarding the final LCR Working Group Report for completeness, as it highlights issues and concerns with the recommendations in the report.

If you have any questions, feel free to email or call.
